

Cortina Cooker

OLD-STYLE CHARM FOR THE ULTIMATE IN COOKER EXPERIENCES

The beauty of traditionally-made products in appliances which elegantly interpret the style of captivating residences and luxury homes. The new Smeg cookers in the Cortina Line take their inspiration from the mastery of mountain craftsmen where luxury design and elegant finishes go hand in hand with technologically advanced performance. Precious and antiqued materials are teamed with shiny chromium-plated, brass-coated and antiqued silver finishes for a sophisticated and elegant look. The details conjure up a style which is warm and timeless: the backguard is decorated with an elegant ornamental pattern, the knobs are round with the logo screen printed, while the clock and figures have an old but unforgettable feel.

Smeg never overlooks the functions of its appliances and these new cookers are no exception, providing the maximum in cooking solutions. The hob surface is equipped with cast iron grills and 6 gas burners, including an ultra-rapid 4.2 kW burner. This multifunction oven offers a good 80 litre net volume capacity and is finished by a spacious food warming drawer under the cavity.

The luxurious Cortina cookers are available in four colour versions: CC9GPX, cream with chrome finishes; CC9GPO, cream with brass finishes; CC9GAX, charcoal with chrome finishes and CC9GAS, charcoal with antiqued silver finishes.

Cortina cookers are the perfect solution for those seeking an appliance with unforgettable class for whom maximum performance is essential.

Smeg also provides ovens and hobs in the Cortina Line in the same style.
